Allowable Subject Matter

- 1. Claims 22-25,27-28,47-50,52,53 and 57 are allowed over art.**
- 2. The following is an examiner's statement of reasons for allowance:**

At the time of Applicant's invention, prior art fails to teach method of downloading data to an MPEG receiver/decoder including the signature and other data in a block of data, the signature being dissimulated in the data block by using a selected offset between the start of the data block and the start of the signature, formatting the data to be downloaded and the encrypted data block as an MPEG table and transmitting the MPEG table. Prior art further fails to teach at the receiver/decoder wherein looking up at least one stored offset in a protected area of memory of the receiver/decoder, extract the signature from the decrypted data block using said one looked-up offset from the start of the decrypted data block, generating a signature for the data in the received MPEG table, and comparing the signature extracted from the decrypted data block with the signature generated at the receiver/decoder for the received data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
